

REMARKS

Claims 1-11, 13, 15, 17-21, 23-28 and 30-37 are pending; claims 1, 3, 13, 15, 17, 19 and 34 have been amended; claims 12, 14, 16, 22 and 29 have been deleted and claims 35-37 have been added. Support for claims 35-37 appears in original claims 3, 5 and 34 respectively.

Claim 1 has been limited to the subject matter of claims 14 and allowed claim 16.

Claim 14 was rejected under 35 USC 112, second paragraph, as being indefinite in the term "parent structure". Claim 14 is not indefinite since all the resins and addition copolymers recited in the claim are well known in the art. One of ordinary skill in the art would know from the claim language the type/kind of backbone and/or polymer is present as the "parent structure".

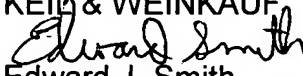

With the indication of allowability of claim 16, the limitation of "parent structure" to those defined in claim 14 and the cancellation of claims 22 and 29, all the claims are now allowable. Accordingly the examiner is requested to pass the case to issue on claims 1-11, 13, 15, 17-21, 23-28 and 30-37.

Applicants would like to make of record related commonly assigned application Serial No. 10/089,171 which is directed to solids containing groups which are attached to the parent structure via urethane groups and which contain bonds which can be activated with actinic radiation.
